

As an **Accredited Training Organisation for Agile Project Management**, we deliver fully accredited Agile Project Management courses for all levels of Agile PM personnel. We deliver **scheduled open courses** throughout Europe and **in-house courses** for public and private clients globally. Our trainings are delivered worldwide in English and Spanish.

▶ **Scheduled Open Courses**

Standard Training Sessions organised for individuals in the following countries: Belgium, Germany, France, Italy, Spain.

▶ **In-house courses**

Customised Training Sessions at your preferred location and date worldwide. This solution will allow your company to train a number of your employees together reducing the cost of this investment, and will guarantee a training tailored to the needs of your company.

Tailor-Made Services

We provide additional services to the Foundation and Practitioner courses for all levels of project personnel. These are highly customised services, created according to your individual requirements.

▶ **Agile Project Management Overview**

The Agile Project Management Overview Course provides delegates with a guide on how Agile Project Management might be used to improve project success. This one day event provides an introduction to the Agile Project Management approach, focusing on the agile approach and the value of using it for implementing projects.

▶ **Agile Project Management Consultancy**

In addition to training, we provide a complete solution to ensure that the standards of the method are embedded and customised to your business environment.

QRP International is a training and consultancy provider of Best Practice Management Methods, specialised in the Office of Government Commerce's (OGC) Best Practice standards like:

- ▶ PRINCE2 - Project Management
- ▶ MSP - Programme Management
- ▶ P3O - Portfolio, Programme and Project Offices
- ▶ ITIL - IT Service Management

Our accredited Quality Management System ensures the high Quality of our services; the focus on Results allows us to provide highly customised trainings with case studies created in cooperation with our clients; the focus on People is assured with the use of certified trainers, with international experience in Project and Programme Management

If you have any inquiries about our services please contact us.

Agile Project Management

The innovative approach to Project Management

Agile Project Management Learning Path

Agile Project Management

- ▶ Based on DSDM Atern.
- ▶ Established and proven integration between DSDM® Atern® and PRINCE2®.
- ▶ Aligned to OGC's PRINCE2®, MSP®, and M_o_R®
- ▶ Owned by the DSDM Consortium, a not-for-profit collegiate organization.

About Agile Project Management

AGILE Project Management is an innovative approach to project management, which helps people work effectively together to achieve business goals. This new guidance provides the ability to deliver Agile Projects in organizations requiring standards, rigour and visibility around Project Management, while at the same time enabling the fast pace, change and empowerment provided by Agile.

Agile Project Management works alongside more formal project management approaches such as PRINCE2® and complements quality processes such as ISO90001 and CMMI.

Agile Project Management is based on the proven fundamentals within DSDM Atern, which has always been the only Agile method to fully address the concept of an Agile project, and provides detailed guidance on how to manage and deliver Agile projects.

Benefits

- ▶ Provides an approach that **offers agility but retains the concepts of a project**, project delivery and project management.
- ▶ Enables organizations to gain the benefits of an agile approach **without introducing unnecessary risks**.
- ▶ Provides a **flexible yet controlled process** that can be used to deliver solutions.
- ▶ There is no need to develop and integrate company-specific Agile management processes, the organization can **simply adopt a tried and tested approach**.
- ▶ For an organization which already uses PRINCE2, adopting Agile Project Management **enables the continued use of PRINCE2** with Agile Project Management providing complementary, tried and tested Agile.
- ▶ For an organization that may be new to Project Management and wanting to deliver Agile projects in a controlled way, **Agile Project Management alone will provide sufficient guidance to allow for successful management and delivery**.
- ▶ Combines effective use of people's knowledge together with techniques such as iterative development and modelling to achieve tight project delivery timescales.
- ▶ Unlike a traditional approach, AGILE fixes Time, Cost and Quality at the early phases of a project.

Agile Foundation Course

The Foundation level is aiming to measure whether the candidate has sufficient knowledge and **understanding of the Agile Project Management guidance** to be able to recognise and distinguish between the key elements of the approach.

To this end they need to show they understand Agile Project Management philosophy, principles, processes, people, products, techniques and guidance.

This is a **three day** course, delivered as a classroom event and is designed for people who require a general level of Agile Project Management understanding. The Foundation examination can be taken on the afternoon of the third day.

Objectives

Following the completion of the course participants should:

- ▶ The underpinning **philosophy and principles** of Agile.
- ▶ The **lifecycle** of an Agile project, including alternative configurations.
- ▶ The **products** produced during an Agile project and the purpose of these.
- ▶ The **techniques** used and their benefits and limitations.
- ▶ The **roles and responsibilities** within an Agile project.

Foundation Target Audience

- ▶ Practising project managers
- ▶ Agile team members who wish to become Agile Project Managers

It is desirable but not essential that participants have some experience of working on projects.

The Foundation qualification is a pre-requisite for the Practitioner qualification.

Agile Practitioner Course

The Practitioner level is aiming to measure whether the candidate has sufficient **knowledge and understanding of the Agile Project Management guidance** to apply and tailor it to a given scenario situation.

The scenario is designed to allow the candidate to demonstrate competence to begin working as an Agile Project Manager on a non-complex project.

This is a **two day** course, delivered as a classroom event and is very detailed with a focus on scenarios. The Practitioner examination can be taken on the afternoon of the second day.

Objectives

Following the completion of the course participants should:

- ▶ **Apply the underpinning philosophy and principles** of Agile DSDM Atern in a project situation.
- ▶ Appropriately **configure the lifecycle** of an Agile project to a given scenario.
- ▶ **Produce and evaluate the content of Agile products** produced during an Agile project in a given scenario.
- ▶ **Identify the Agile techniques** to be used for a given situation within a scenario.
- ▶ **Understand the roles and responsibilities** within an Agile project and correctly determine the appropriate personnel to fulfil these roles within a given scenario.
- ▶ **Understand the mechanisms for control** of an Agile Project which are specific to an Agile project.
- ▶ **Understand in outline how to test, estimate and measure progress** in an Agile project.
- ▶ **Describe the agile approach** to managing requirements and **identify action** to rectify problems with requirements within an Agile project from a given scenario.

Practitioner Target Audience

- ▶ Practising project managers
- ▶ Agile team members who wish to become Agile Project Managers

The Foundation exam must have been passed if attending the final two days of the course.
